

Radiological Instrumentation

Calibration

For over 30 years Scotoil Services Ltd has operated Scotland's premier onshore facility authorised for the removal and disposal of NORM scale.

Current legislation established the requirement that all operational radiation contamination monitors and dose rate meters should, as a minimum, be subject to an annual inspection and test.

Scotoil Services Ltd provides an efficient and professional service for the repair, testing and calibration of gamma dose rate and alpha / beta contamination monitors.

All equipment is calibrated in accordance with the requirements laid down in the examination, testing and calibration of portable radiation protection instruments - measures and Good Practice Guide, produced by the National Physics Laboratory.

Scotoil Services has been assessed and is compliant with ISO 9001, 14001 and 45001.

Scotoil Services has a purpose built instrumentation facility, which enables us to carry out calibration with certification on a complete range of contamination monitors and does rate meters.

With the introduction of the new facility we are able to offer competitively priced calibrations with an unprecedented turnaround time.

SCOTOIL SERVICES
A TRADEBE COMPANY

Radiological Instrumentation

Key Service Features

- Typical turnaround of three days on inspection and calibration
- Express service available on request
- Fast turnaround on standard repairs – usually seven days
- Calibration of contamination monitors against a range of isotopes
- High Precision Dual Source Calibration
- Dose rate meter saturation testing

Sales and Hire

Scotoil Services carries a range of monitors and dose rate meters in stock for sale and hire. The equipment is suitable for use within the oil and gas industry as well as other industrial, research and teaching facilities.

Instrumentation Repairs

Our fully trained and experienced staff carry out general maintenance and a fully comprehensive range of repairs on portable contamination monitors and dose rate meters at our fully equipped instrumentation facility, situated within our headquarters in Aberdeen.

Sustainability at Work
